

Compliance Monitoring Strategy (CMS) Plan Fiscal Year 24-25

Polk County, Iowa
Public Works Department
Air Quality Division
August 31st, 2023

1.0 INTRODUCTION

The Polk County Public Works Department, Air Quality Division (AQD) conducts a local program to maintain air quality, protect public health, and protect the environment. The AQD ensures compliance with air regulations through the following compliance monitoring strategy (CMS) activities:

- Performing facility full compliance evaluations (FCE),
- Performing facility partial compliance evaluations (PCE),
- Investigations by performing on-site facility inspections,
- Review facility records and operating logs,
- Assess process parameters,
- Perform visible emission observations,
- Utilize advanced monitoring technologies,
- Issuing construction and operating permits,
- Enforcement actions,
- Reviewing self-monitored reports,
- Assuring quality of measurements and operations,
- Observe stack tests,
- Reviewing source test results.

These activities may include both on-site and off-site compliance evaluations. The activities may be initiated based on a variety of factors such as the CMS plan, priorities of the environmental protection agency (EPA), Iowa Department of Natural Resources (IDNR) and local program, joint inspections with the IDNR, citizen requests or for cause. The AQD performs evaluations of facilities to determine compliance not only with federal, state and local regulations, but also with permit requirements. Permits codify applicable requirements and place on facilities other conditions and limitations necessary for achieving clean air goals. Enforcement actions are necessary to regain facility compliance and deter further violations. Self-monitoring is required at specified facilities where it is necessary to assure compliance on a continuous basis. In specific instances, an expanded set of tools may be used to determine compliance such as geospatial measurement of air pollution, air dispersion modeling, fence-line monitoring and infrared cameras are a few examples.

2.0 GOALS

The EPA requires a biennial plan from the AQD that lists our goals for a two-year period. The EPA also requests revisions to the plan for the second year.

The AQD strives to perform full compliance evaluations at all Major facilities every year. Any facility not covered by this plan is automatically assigned to the next fiscal year. The plan has been developed by AQD under guidelines revised in the EPA's "Clean Air Act Stationary Source Compliance Monitoring Strategy" (CMS), dated October 4th, 2016.

The CMS policy encompasses Title V facilities and synthetic minor facilities that emit or have the potential to emit at or above 80% of the Title V major source threshold and minor source facilities. The CMS recommends that a Full Compliance Evaluation (FCE) be conducted at Title V facilities once every two years. For synthetic minor facilities that emit or have the potential to emit at or above 80% of the Title V major source threshold, an FCE is recommended once every five years.

2.1 LOCAL PROGRAM –COMPLIANCE MONITORING GOALS

The AQD's general goals for FY24 and FY25 is to conduct FCEs and on-site visits at all Title V facilities every calendar year, all synthetic minor facilities once every 36 months and all minor facilities once every 60 months. In appendix A, the inspection completion schedule for Title V facilities are listed in table 1, synthetic minor/SM80 facilities are listed in table 2 and minor facilities are listed in table 3.

3.0 ADDITIONAL COMPLIANCE ACTIVITIES AND PRIORITIES FOR AQD

The AQD performs additional compliance monitoring activities beyond those addressed in its CMS policy. For instance, the AQD inspects minor facilities and responds to hundreds of open burning and citizen's complaints not covered under EPA's CMS policy. This CMS policy is not designed to preclude these types of activities conducted by the local program.

4.0 CMS PLAN

Any new facility that is not listed in this plan will automatically be assigned to FY24-25. The plan has been developed by AQD under guidelines revised in the EPA's "Clean Air Act Stationary Source Compliance Monitoring Strategy" (CMS), dated October 4th, 2016.

5.0 FACILITY SPECIFIC LISTS (Title V, SM-80s & Minors)

The AQD's general goal is to conduct FCEs and on-site visits at all Title V facilities every year, all synthetic minor facilities once every 36 months and minor facilities once every 60 months. Title V major sources (as defined in CAA §501(2)); and synthetic minor sources that emit or have the potential to emit (PTE) at or above 80 percent of the Title V major source threshold (SM-80s). The Title V federal fiscal year completion dates are included in table 1. Table 2 includes SM-80 and Table 3 minor sources.

Table 3: Polk County Air Quality Division – Minor Facilities. The table excludes Title V & SM80 facilities.
Inspection Schedule: Once every 60 months, Source: EPA ECHO

6.0 CMS PROGRAM REVIEW

The Local Program will address any identified CMS program deficiencies per Section 5.2.1 (Review of Local Program) of the annual contract. Biennial program audits will be conducted by the Iowa DNR. The Iowa DNR will submit information on significant changes to the program requirements to the Local Program within ninety (90) days of the review.

7.0 RETENTION OF COMPLIANCE MONITORING REPORTS AND RECORDS (CMRs)

The local program retains electronically scanned and hard copy CMRs indefinitely. However, the local program at a minimum will retain CMRs in accordance with the following retention timeframes which are consistent with EPA records policy:

- CMRs documenting evaluations that do not lead to enforcement: 5 years.
- CMRs documenting evaluations that lead to a civil administrative enforcement action: 10 years after closure of the enforcement file.
- CMRs documenting evaluations that lead to a civil judicial or criminal enforcement action: 20 years after closure of the enforcement file.

8.0 INTEGRATED COMPLIANCE INFORMATION SYSTEM (ICIS)-AIR REPORTING

The local program will collect compliance information in a consistent format that allows EPA to evaluate and compare compliance monitoring programs. The local program will continue to maintain records of compliance monitoring activities, and enter facility-specific compliance and enforcement data in Integrated Compliance Information System (ICIS)-Air on a routine basis. All CMS data is to be entered in ICIS-Air within 30 days. Quarterly, the local program reviews EPA's State Review Framework (SRF) metrics for Clean Air Act (CAA) data entry timeliness and consistency.

Source: EPA ECHO, a blank "AIRLastFceDate" indicates that the facility may be a new facility or marked for inspection within 90 days.

Table 3: **Minor Source List.**

The table excludes Title V & SM80 facilities.

Last evaluation dates are intentionally excluded since these facilities are considered a low priority for inspection in FY22-23.

Inspection Schedule: Once every 60 months.
