Polk City United Methodist Church	1421 W. Broadway, Polk City

In the spring of 2016, Polk County Conservation worked with 10 religious organizations to install native pollinator gardens at their places of worship. In addition to providing the garden designs and native plants, we educated congregations about pollinators and steps they can take at home to help pollinators. This project was made possible by a Resource Enhancement and Protection-Conservation Education Program (REAP-CEP) grant.
