Radon Test Kit Order Form

Radon is the leading cause of lung cancer among non-smokers. Tests show Iowa has the highest percentage of homes with radon levels above the EPA action guideline of 4 picocuries per liter of air.

Radon may be a problem in your home. You can't taste, see or smell it. You can only find Radon by testing.

Radon is a cancer-causing, radioactive gas. All Iowa homes should be tested, especially those with children.

THE GOOD NEWS IS

Radon testing is easy and inexpensive.

You can correct radon problems.

Start today. Send the coupon below to order a radon test kit.

Order your radon test kit today for just \$6.15

Name _____
