

Enable Location Services on iPhone

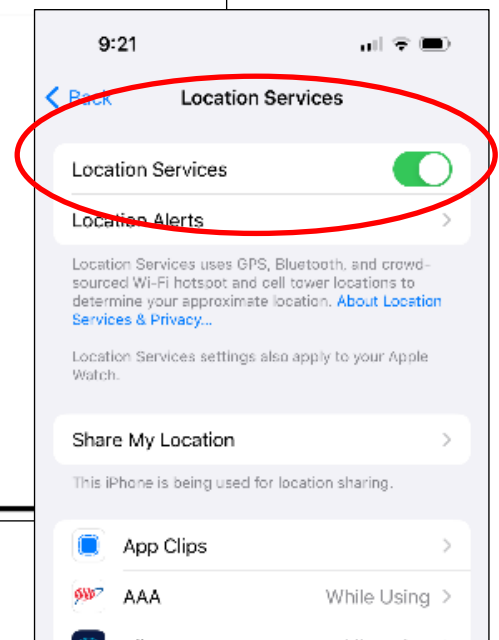

How To Enable Location Services on iPhone for Mobile Check In

1. Click on the settings icon from your iPhone home screen.
2. In the search bar at the top, type "**location**" in the search bar.

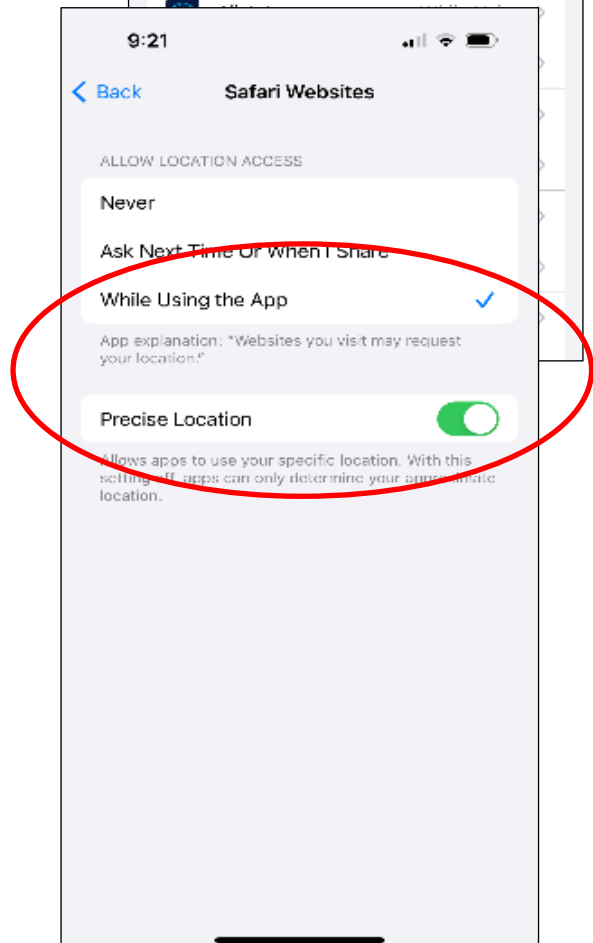

3. Click on the blue and white icon named "**Location.**"

4. Make sure **Location Services** is enabled and is green for **turned on.**

5. Scroll down the list of applications and click on "**Safari Websites.**"

6. Make sure location access is set to "**While using the app**" and **Precise Location** is enabled and is green for **turned on.**

7. Once location settings have been updated, return to the check in link and the **blue check in button** should appear on the screen. Click to check in.
